Hiring Manager
Huawei
Markham, Ontario, Canada

Dear Hiring Manager

I am excited to apply for the position of Software Engineer - Web (Co-op) as advertised on the University of Toronto PEY job board. It is a great opportunity for 12 months of crucial, real-world experience of industry software development for any student!

Having just begun my career of software development, I've managed to gain some important, insightful experience about the development process. My previous internship position at Verto Health as a software engineer helped me adjust to the fast-paced the Agile development process where I became familiar with new tools such as Vue, Jira, and Ruby on Rails quite quickly. I hope I am able to take what I learned in school in tandem with my previous software development experience and apply it to a real-world problem at Huawei.

Learning new tools and frameworks is very appealing, especially when working in environments that have a goal of improving people's lives and experiences. When developing software at Verto, I realized how many healthcare clinicians my code could help reach even as an intern. To me, Huawei provides that opportunity in a much larger scale. To work at Huawei which has such a high impact on the telecommunications industry, would be extremely rewarding, and I would love to utilize all my development knowledge to do so.

I am positive that my strive for positive impacts, desire for knowledge, and experiences highlighted here and in my resume makes me and ideal candidate for the Software Engineer - Web (Co-op) position at Huawei.

Sincerely yours,

Simon Chen
